

FIRE DANGER FORECAST IN LEBANON

Period	01 Nov – 03 Nov, 2024
Publication	31 Oct 2024 - 13:10
Weather Forecast	31 Oct, 2024
Data Source	Mf

Land and Natural Resources Program
Institute of the Environment
University of Balamand

The presented fire danger index (Mitri, 2015) is based on a cross-tabulation between Lebanon's fire risk map (Mitri et al., 2015) and the Fire Weather Index (FWI) as produced by the European Forest Fire Information System (EFFIS).

Fire Danger Index Level	Description
NR	No significant wildfire risk
VL	Very low possibility of any fire occurrence. Fires (if any) can be easily suppressed.
L	Low possibility of fire occurrence. Fires can mostly occur in grassland and shrubland. Fires can be easily controlled.
M	Moderate possibility of fire occurrence. Fires can be controlled at early stages but can also become intense and uncontrollable if not suppressed immediately. Fires need to be very well extinguished.
H	High possibility of fire occurrence and spread. Fires are most likely uncontrollable, fast, and intense. The careful surveillance of areas with VH fire danger is highly recommended. Homes, infrastructures, protected forest areas, and forest natural reserves might be at high risk of fire. The careful surveillance of areas with "High" fire danger is highly recommended. Fires need to be very well extinguished and monitored after suppression.
VH	Very high possibility of fire occurrence and spread. Fires are uncontrollable, fast and intense spread affecting relatively large vegetated areas. Homes, infrastructures, protected forest areas, and forest natural reserves are at very high risk of fire. The careful surveillance of areas with "Very High" fire danger is extremely recommended. Fires need to be very well extinguished and monitored after suppression.
E	Extreme conditions of fire occurrence and spread. Preparedness must be increased at a maximum level.

Reference project:

This product is an outcome of the project "Towards a better assessment and management of wildfire risk in the Wildland-Urban Interface (WUI) in Lebanon: gaining from the US experience" (2012-2016), managed and implemented by the Land and Natural Resources Program (LNR) at the Institute of the environment (IOE), the University of Balamand (UOB) and funded by the United States Agency for International development (USAID) in agreement with the US National Academies of Sciences (NAS) within the Partnerships for Enhanced Engagement in Research (PEER) program. The US collaborator on this project is the Department of Earth Sciences, Montana State University.

Acknowledgements

This product is made possible by the generous support of the American people through the United States Agency for International Development (USAID). The content is the sole responsibility of the University of Balamand and do not necessarily reflect the views of USAID or the United States Government. Forecasted Fire Weather Index data are provided by the European Forest Fire Information System – [EFFIS](#) of the European Commission Joint Research Centre. The automation of the product was made possible with the technical support of [GIS/Transport, Ltd.](#)
